

SATELLITE MONITORING OF YOUR FREIGHT CONTAINERS WITH REUSABLE ANTS™ TAGS

**PROVIDES INTERNET MONITORING AND TRACKING OF
TAGGED CONTAINERS ANYWHERE IN THE WORLD**

- TRACKS CONTAINERS THROUGH GPS SATELLITE UP-LINK FROM INSIDE WAREHOUSES OR IN STACKS OF CONTAINERS
- USES SENSOR PROBE INSIDE CONTAINER TO DETECT INTRUSION, STOWAWAYS OR MOVEMENT
- DETECTS TRANSPORT OR MOVEMENT OF CONTAINER
- TIME STAMPS ALL EVENTS FOR DISPLAY ON INTERNET

ANTS™ tags talk to each other to relay data out of warehouses, in stacks of containers or around other obstacles to find the satellite up-link device called **U-ANTS™**. Then all the data from the satellites is transferred to the internet for authorized users to locate, verify security, or time its delivery to destination. In large container yards **U-ANTS™** are located every few hundred yards. **U-ANTS™** are totally self-contained with solar battery.

Surcharge cost per shipment is only a few percent added to the usual shipping charges for transportation. See your local shipping agent, carrier or forwarder.
